CORE SKILLS

Programming

HTML5

CSS3

JavaScript (ES6+)

Frameworks & Tools

ReactJS

Next.js

Bootstrap

Tailwind

Docker

Git & GitHub

VS Code

JORDY CAHYA BUANA

JUNIOR FRONTEND DEVELOPER

PROFESSIONAL SUMMARY

Dedicated Frontend Developer with a strong foundation in HTML, CSS, and JavaScript, along with practical experience implementing modern frameworks such as ReactJS, Next.js, and Bootstrap. Graduate of the intensive Bangkit Academy program with expertise in technical problem-solving, version control (Git), and utilizing Docker. Capable of collaborating effectively in teams to build intuitive, responsive, and high-performance web applications.

EDUCATION

SMK PGRI 1 Giri **Banyuwangi, East Java | 2020**
Computer and Network Engineering

Studied the fundamentals of computer networking, hardware assembly, operating systems, and IT device troubleshooting.

Universitas Brawijaya **Malang, East Java | 2020 – 2026**
Bachelor of Computer Science (Informatics Engineering)

- **Cumulative GPA:** 3.31/4.00
- **Specialization:** Web Development & Front-End Engineering
- Actively engaged in software development activities and the completion of modern web-based projects.

EXPERIENCE & TRAINING

Bangkit Academy **2022**
Tech Academy Cohort Participant

Led by Google, Tokopedia, Gojek, & Traveloka

- Completed an intensive national technology training program focused on modern application development, technical problem-solving, and professional soft skills enhancement.
- Developed cross-functional collaboration skills and applied industry best practices in the application development lifecycle.

PROJECTS & THESIS

Thesis: Android App UI Performance Analysis

Jan
2026

UI Interface Comparative Research (RecyclerView vs LazyColumn)

- Conducted an in-depth comparative performance analysis between RecyclerView and LazyColumn components for displaying large-scale datasets in Android applications.
- Designed, tested, and evaluated UI implementations to measure system resource efficiency metrics (memory & CPU), graphics rendering speed, and overall responsiveness.

Personal Portfolio Website

Personal Project

Frontend Web Development

- Designed and developed a fully responsive interactive portfolio website across various devices.
- Showcased creative works, development project history, and technical skills visualization using modern web technology standards.
- Focused on clean code architecture, page load optimization, and user-friendly interfaces (UI/UX).

Pixel Racing Car Game

Personal Project

Interactive Web Game

- Developed a retro-style (pixel art) web game independently from concept stage to implementation.
- Implemented basic physics logic, collision detection systems, and responsive player control interfaces.
- Built real-time score calculations using modern JavaScript to provide an interactive and seamless gaming experience.
